Welcome to Zesty Cheese Ranch!

Thanks so much for staying here with us. Please take a look through this guide book to learn a bit more about the property, learn about things to do in the area, and the procedure for check out, trash, etc.

The TL;DR

- Wi-Fi password is 'givemeinternet'
- Use the Roku to sign into your own netflix accounts on the TV
- Trash - bring bags to the down dumpster 1 block away, or leave in a trash in the bin outside when you leave
- If you use the griddle be careful to clean it properly so it doesn't rust
- Hue Lights - two remotes control the whole house, leave all switches ON
- Winter: Don't unplug the heater Wi-Fi control boxes, leave heaters on low when you check out.
- Summer: Careful not to leave the patio heater by mistake, close windows for HVAC to work properly.
- Eat at the Goldfield Diner, Mozarts is the good bar; 30 min drive to Tonopah
- Stay out of locked areas + the firetruck. Checkout is 11am.
- Our home is a LGBTQ+ safe space and our friends are babyfurs and ABDL's

Wi-Fi & TV Information

We have a Ruckus mesh Wi-Fi system for the property that is fed by a 0.5mi wireless backhaul to fiber located at the County courthouse. Speeds are approx 50-60 Mbps down. It is pretty reliable with outages occurring 3-4 a year. For an additional fee (\$50 activation + one month of service) we can make available a backup T-Mobile 5G Hotspot system. We also have Starlink available for an additional fee (\$100 activation + one month of service) this is helpful for large groups or where you need very large amounts of data or absolutely must be online.

The existing internet is fine for 95% of guests and we've had groups of up to 40 use the basic system. We do not have guest accessible hard lines at this time.

Guest Wi-Fi:

Zesty Cheese Ranch Guest

Password:

givemeinternet

TV

There is an Apple TV box that should be put away. If it is accidentally left out please unplug it and instead use the Roku.

The Roku may be factory reset and you can sign in to all your own TV Accounts for Netflix, Hulu, Amazon, HBO, etc.

There are two remotes - the Roku Remote and the TV Remote.

There is also a Bowers & Wilkins Sound System you can use, but it is currently missing the remote control for the receiver so you would need to use the controls on the receiver to control it. It has Bluetooth, internet radio, AUX inputs, and USB to play FLAC Files. We suggest not using it unless you are familiar with these systems.

Philips Hue Smart Lighting System

Every light in the house is a RGB+W Philips Hue light. There are two master switch remotes that are magnetic and can be removed from the wall plates. One in the back door way to control the deck. The other is in the back entryway by the laundry room to control the lights for the entire house. With these remote controls you can dim, change color, or turn on/off all the lights with one button. In order for the remote to work you must leave the fixtures on, and switches to on. If you would like the lights turned to red/blue/green/purple or multiple colors please message your host and they can VPN into the Philips Hub and adjust the colors manually. The Hub is not accessible to guests to pair their phones to the system without prior arrangements.

The deck pictured before the 67' building was installed next to it in color mode.

There is a motion sensor on the smaller trailer that turns on the deck lights automatically, if you want the deck lights off but keep tripping the sensor just throw a small towel over it temporarily. The stars are beautiful at night.

Laundry

You may use the washer and dryer. If you are staying extended periods and doing multiple loads of laundry we just ask that you use your own detergent, or replace what you use.

Trash

The town dumpster is located 1 block away. Drive across US95, turn right on the second street. It is right there and can't be missed. It is free to use 24/7.

It would be most appreciated if you could drop off trash there. If you can't please leave your trash outside in the bin with the lid closed so animals do not get at it or it does not smell up the house.

The Blackstone Griddle

You are welcome to use the outdoor griddle on the condition that you clean it properly so that it does not rust or get damaged. Never leave the griddle dirty between uses. Google "Blackstone cleaning" for many youtube videos on how to do this. The basic instructions are scrap the griddle when you are done, wipe off food debris with water and paper towel, turn it to 100% for a few min to burn off any remaining stuff and dry the surface, let it cool then put a thin layer of oil or cooking spray on the grill to keep it properly seasoned and from rusting between uses.

Winter at the Ranch

In the winter months we use space heaters to keep the place warm. There are three heaters total and you may use them anywhere you like. They should be on prior to arrival, if not you may need to click the button on the Wi-Fi box. Then once the heater has power you may adjust the temperature as desired.

Power Button on the side!

When you leave please ensure that the heaters are all **turned to low**, and connected to the Wi-Fi control boxes. We do this so our power bill doesn't turn into \$500+ a month on heaters running all the time. There is a Wi-fi temperature sensor in the house and automations programmed to turn the heaters on/off so the pipes don't freeze. Locations:

1. One oil heater should be placed in the laundry room (power from behind the door of the small bedroom)
2. One oil heater should be in the bathroom near the toilet (power from counter)
3. The fan heater should go on the kitchen counter (outlet on the counter)

Note - sometimes the hot water gets shut off; it usually takes 45-60 sec for hot water but if you still have issues check the breaker box in the hall and ensure the one labeled hot water heater is turned on. There are some breakers for the furnace and AC that are to remain off as the furnace is out of order, so use caution and read carefully.

Summer at the Ranch

The summer is the nicest season in our opinion. The weather is perfect to relax and unwind on the deck.

Feel free to use the patio heaters, just be very careful not to leave them on when not in use as they use about \$2-4 per hour to run in electricity. 80 amps at 220V total or about the heating power of 20 standard propane patio heaters.

They are controlled by switches on the poles. 2 junction boxes, 4 switches total. One switch per element. It is recommended you start at 25% power and go up from there if you are still cold.

The HVAC system is essentially a giant swamp cooler. It is controlled inside the hallway and has a fan only, cool low, and cool high. It is incredibly effective at cooling provided all the doors and windows are closed. There is an exhaust window in the bathroom that opens automatically to let air out so you may notice a breeze in the bathroom and notice that the door has a slight gap in the bottom. This is intentional and part of the design.

We actually had AC at one time and removed it as the swamp cooler system in the extremely dry climate of Goldfield is more effective than traditional air conditioning and has the benefit that it also humidifies the air so you sleep better.

Summer is also a great time for using the firepit; just keep it to 2-3 logs in the metal solo stove with wood that you supply or the HVAC will suck in smoke. Don't move the solo stove on to the deck as it can damage it.

House Rules

1. Stay out of locked areas. Those are the closet in the small bedroom (used for storage of camp crinkle supplies), the shed, the smaller trailer, the RV trailer, the fire truck.
2. No fireworks on the property - instead talk to the fireworks store owners for directions to the quarry area in town where it is safe and legal to play with fireworks
3. Pickup all trash, be courteous to the neighbors, etc
4. Clean and season the griddle immediately after every use so it doesn't rust if you use it
5. Lock the doors when you leave, leave the key in the lockbox
6. If you eat food, replace it with the same or similar items, don't touch items that are labeled or marked not to eat.
7. Please don't use the crystal glasses above the fridge; they are super fragile and could get damaged easily. They are my grandmother's family crystal.
8. Cameras are located on the property for security. Please do not touch them.
9. Take the trash out - read specific in trash section

Free Food

Goldfield doesn't have a lot open and is pretty far from everything. In an effort to help our guests we typically keep the pantry stocked with food items. Feel free to help yourself to anything that is not labeled otherwise. We just ask that you try and replace what you eat with the same or similar items before you leave. The silver freezer also typically has **frozen croissants, cookies, and other pastries**. That is our gift to you, and you are **not expected to replace those items**. Please enjoy!

EV Charging

There is a Tesla Charger on the pole that is free to use for all guests staying at the house. There is also a 50 AMP plug there too to connect RV's or other chargers.

So What's with the Adult Diapers?

You may have noticed some super cute looking adult diapers that have prints on them and look like baby diapers but larger. Good eye! Feel free to try one on.

As much as we try to put them away (that is what is in one of the locking closets, and in the fire truck) oftentimes our friends will accidentally leave a pack or a diaper or two behind or perhaps you've heard someone around town talking about diapers, adult babies, and those kiddos at the cheese house, etc. So let me explain....

AB/DL is the acronym for Adult Baby / Diaper Lover, and babyfurs are a subset of the furry fandom (costume, cosplay community) that are also ABDL's.

The A stands for Adult - and this is super serious. None of our community involves minors and we are not pedofiles.. We are a community of (mostly LGBTQ+) **consenting adults** that like to roleplay as younger characters or who are **medically incontinent** and need diapers and want to be around others that don't judge us but who embrace diapers, onesies, shortalls, and other ageplay gear.

Life is super stressful so getting to forget about bills, obligations, and just go back to a time where you felt loved, cared for, and safe is absolutely amazing. Others just love the feeling of being put in a diaper. It might sound strange but don't knock it till you try it out for yourself. Many are surprised how practical and convenient adult diapers are. Also, we don't use the crappy low quality things you see in the store like Depends. We wear and use high quality purposely designed ABDL diapers from companies like AB Universe, Tykables, Crinklz, and more...

Camp Crinkle

The property was not designed to be an airbnb; it was designed to be a place to host an ABDL Summer Camp for all of our babyfur friends to come up and have the best week of their lives being silly, wearing diapers, adult baby clothing, and cooking, drinking and hanging out together.

Hence why the house is painted with bright colors (we tried to make it feel like a giant kids playroom), the baby toys in the bedrooms, and some of the art you see.

Our House will always be a safe space for ABDL's and LGBTQ+ individuals.

About Goldfield, NV

Goldfield was the largest town in Nevada in 1910, then later burnt down, and the mine stopped and it became a ghost town. Today less than 200 people live here.

Nacho's Top Picks of Stuff Todo

If you like off-road activities Zesty Cheese Ranch is the place for you! 1000's of miles of BLM trails exist just steps from the ranch. Head down Crystal Ave towards the International Car Forest, or head out near the cemetery and follow the trails.

Don't own a Jeep? You can rent them from Fox Rent-A-Car in Las Vegas.

Visit the International Car Forest

Just a 5 min walk from ZCR check out the iconic car forest - graffiti-painted cars buried in the desert. Climb on them, touch them, sit in them - just watch out for glass. Once a year the town celebrates with a burial and music festival. It is also a great place to watch the stars at night. Take a left at crystal and walk 2 blocks to get there. It is also a great spot at night to stargaze.

Explore the Minning Exhibits

Talk a walk around town and explore. You have the 1907 Schoolhouse (which opens for tours) the historic Goldfield Hotel (it is haunted, they say) as well as the railway museum - a collection of old rail cars you can touch and climb on. Start your adventure by getting a meal at The Dinky Diner. It is the best restaurant in 150mi run by a mother, daughter, and brother. From there talk to the locals and explore!

Fireworks

Check out our local in-town Fireworks Store - Goldfield Fireworks. This place sells MUCH higher quality and unique items compared to your roadside fireworks stores or national chains. They are open year-round and can advise you on safe places that are legal to set off fireworks nearby. Please don;t do it at the ranch. The Sheriff will come and give you a ticket.

Hot Springs

There is a free (24/7) hot springs pool located roughly ten minutes away. Head north on US-95 and turn left at the Silver Peak junction. Follow that road for 5 miles, and the hot springs are just on the left as you approach a T intersection and see a house on the left side.. Don't forget a towel!

Craft Beers and BBQ at Tonopah Brewing

If you like BBQ and good beer then head north 25 miles to the town of Tonopah. There are small casinos with table games and slots, shopping, but the real treasure is Tonopah Brewing. The pizza place is also decent, as is food at both major casino hotels the Mitzpah and the one next to Raily's just skip the Chinese restaurant.

Rockhounding at Gemfield

Want a free souvenir? Like rocks? The gemfield is just a 5 min drive north of town. Follow the signs, it is just past the cemetery. There you are allowed to mine and take rocks and gems. There is a donation box with a suggestion of \$1 per lb.

Look for Wild Burros

Leftover from the mining days - burros, wild donkeys roam the town and surrounding area. They are generally pretty friendly!

Try Whiskey from the Goldfield Distillery

Check out Goldfield's new craft distillery - Old Sam Spirits. Try their stuff at the local bars Mozart or The Santa Fe Saloon, home of Nevada's Meanest Bartender! The better bar in town is the Mozart and they will typically now have hot food in the evenings, and brunch on Sunday's.

Tour a 1906 School Haunted Schoolhouse

Book a Tour with Geri at the Goldstop Inn as you enter town from the north (ask to talk to Jerry) and see inside the 1906 historic schoolhouse. It's one of the coolest things in town; there is even chalk writing on the board from the last class taught there in the 1950's.

Head out to Death Valley

Death Valley National Park is located an hour south of the ranch. There is everything from abandoned mines, castles, to the world famous salt flats and the sand dunes where they filmed Star Wars. HIGHLY recommend a trip there. Bring lots of water, prepare for heat, and gas or charge in Beatty, NV first.

Check Out Info & Site Contacts

Checkout is at 11am. If you would like a late checkout we will try and accommodate you. Please message your host. When you leave please take out your trash, and if it is winter be sure the heaters are plugged in and put back in the correct areas.
